

Quick guide

To recharge atomizer connect micro-USB cable

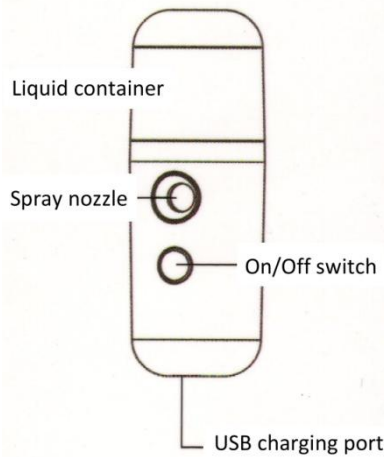

Make sure no alcohol is in the liquid container while charging – fire danger!

To start / stop push button

Blue light on when operational

To open/close Liquid container look out for the notches and profile and twist

- Throughput: 1.25 – 1.45 ml/min
- Holding capacity: 30ml
- Droplet size: 0.3 μ m
- Dry weight: 51g

WARNING:

Alcohol is highly flammable. Never use near open fire or other source of ignition.

PROBLEM DESCRIPTION	SOLUTION
Atomizer not working / no blue light	Recharge the atomizer
Blue light is on but nothing comes out of the nozzle	Battery is weak. Recharge the atomizer
Battery is recharged, still no mist coming out of the nozzle	Nozzle may be clogged. Put a drop of cleaning alcohol on the outside of the nozzle. Never try to clean with a sharp/hard object.
Cannot open Liquid container	Identify the notch and profile and twist accordingly. A reasonable amount of force may be required.
